Circular No. 1.—Office of the Duryce & Forwhe Manufacturing Company, Rochester, N. Y.
The Duryce & Forsylh Manufacturing Company are compalled, coursery to their custom, to lay before the public a few
hosts. Statements calculated to mis ead the public, and thereby
houre the company in its business of making scales, have been
industriously circulated through the newspapers by parties
heavested, and self defence and the cause of truth demand
from us a correction and denial of such statements.

1. A statement, purpor ing to be an editorial notice, is contained in a recent number of the Pennsylvenian, and has been
copied by interested parties into other papers, of a set trial of
scales of the Crystal Parace, in New York. If the allegations
of the statement were true, we should pass them by unsoliced:

saked in a recent number of the Pennsylvanian, and has been copied by interested parties into other papers, of a test trial of scales of the Grysnal Pa ace, in New York. If the allegations of the Grysnal Pa ace, in New York. If the allegations of the Statement were true, we should pass them by unnoticed; has they are no wide of the facts as to need correction. In speciality of the trial, as it is called) he language of the notice for rather advertisement, for it is nothing size, under a very him guise, viz. that of the editor's column is: "The test was then applied to Fairbanks' scale, and when the weight was then applied to Fairbanks' scale, and when the weight variables of the colors of the paid of the second and third corners were the ease; on the fourth corner a slight variation was parounable. So extremely delicate was the operation of 'Fairbanks' scale, (expectly six tons) that a quarter of a pound placed on any part of the platform raised the beam." We are compelled to state that this is untrue! lat, the corner called the fourth did vary two pounds—a variation not very slight, considering the fact that the scale was prepared and adjusted carefully with reference to the trial, and intended to be a model scale for that yarprose. 2d. If required two prunds, either less or more, instead of one fourth pound, (a difference of eight times the alleged weight,) to raise the beam, as the variation was two pounds? Severas days were spent before the trial in proving that scale properatory to the set.

Magain, the 40,000 lb. scale of the Duryee & Forsyth Manufacturing Campany, men'inned in the advertisement in the Pennsylvanian as. varying ten pounds, had a platform twenty feet items, and was purchased of us by the Secor Iron Works, New York, several months previous, and had late loosely and in separate parts in their boller house. ITS FOLLES, VIRE AND DELESSONS.
BY REV. J. W. BANKES OF BROOKLYN.
One vol. 12mo., with expressive a ad characteristic filustrations. Price \$1.

This work fully exposes this recent, vet astonishingly fuscionating delusion. Though it has existed in this country out about seven years, the number of its volvaries is still more greater than is generally believed. In the city of New York alore, their numbers is creditably asted at over 41 000; thin sands of whore, males and ferm es, fully and nightly surround tables, and with extended hands and vetant e es, super-stitusly wait for communications from the spirit world! Read this interesting work, and check the progress of the foolish delusion. MILLER, ORION 2 MULLICAN, Publishers, 25 Park row, New York, and 07 Genesee st., Auburn.
